SERVICE TOUCHPOINTS

- Program / Schedule Management & PMO Consultancy Services
- Whole Suite of Project Management Software
- Information Technology Services
- Project Management Software Trainings
- Software Deployment Support
- Consulting Services

RECENT CUSTOMER SUCCESS STORIES

VISY INDUSTRIES

The client:

VISY Pty Ltd is an Australian-American company that was established in Melbourne in 1948 and is a privately owned paper, packaging, and recycling company. With more than 7000 employees, VISY operates in more than 120 sites throughout Australasia and has trading offices across Asia and Europe

The challenge:

Although the project team at VISY had been using the Primavera Suite of products as their project management information system, the increasingly fragmented database systems and uncontrolled use of disparate systems for different project teams was holding VISY's manufacturing and project teams back from meeting the demands of modern business. It was time to move to a cloud-based solution that would provide a connected, holistic view of the enterprise project portfolio structure and position them for the next stage of growth.

The results:

For VISY, it's legacy applications which it uses in its day-to-day operations are incredibly important. Compass Consult has offered the Primavera P6 EPPM application on Cloud for its project management team and integrated P6 with its legacy ERP application for managing smooth rollout of project related data with wide array of stakeholders located in Australia, Asia and United States

UON LIMITED

The client:

UON is a Western Australian integrated energy company providing turnkey solutions to the resources sector and beyond. Founded in 1998, the company has grown to a size of over 300 staff members.

The challenge:

The project team at UON was using MS Project to manage their project schedule and were finding it very difficult when the project size increased tremendously and resource optimization became incredibly important. All PMs had disparate MSP data that was hard to combine into a portfolio, share resource assignments between projects and this siloed information was leading to too many miscommunications between stakeholders. It was time to move to a cloud-based solution that would provide a connected, holistic view of the enterprise project portfolio structure and position them for the next stage of growth.

The results:

With Compass Consult team's help, UON now has a hi-tech cloud-based project controls system that is based on Oracle's Primavera Suite hosted on OCI. UON was able to achieve better collaboration in the cloud, optimize resources and stay on top of the project portfolio.

DUPONT

The client:

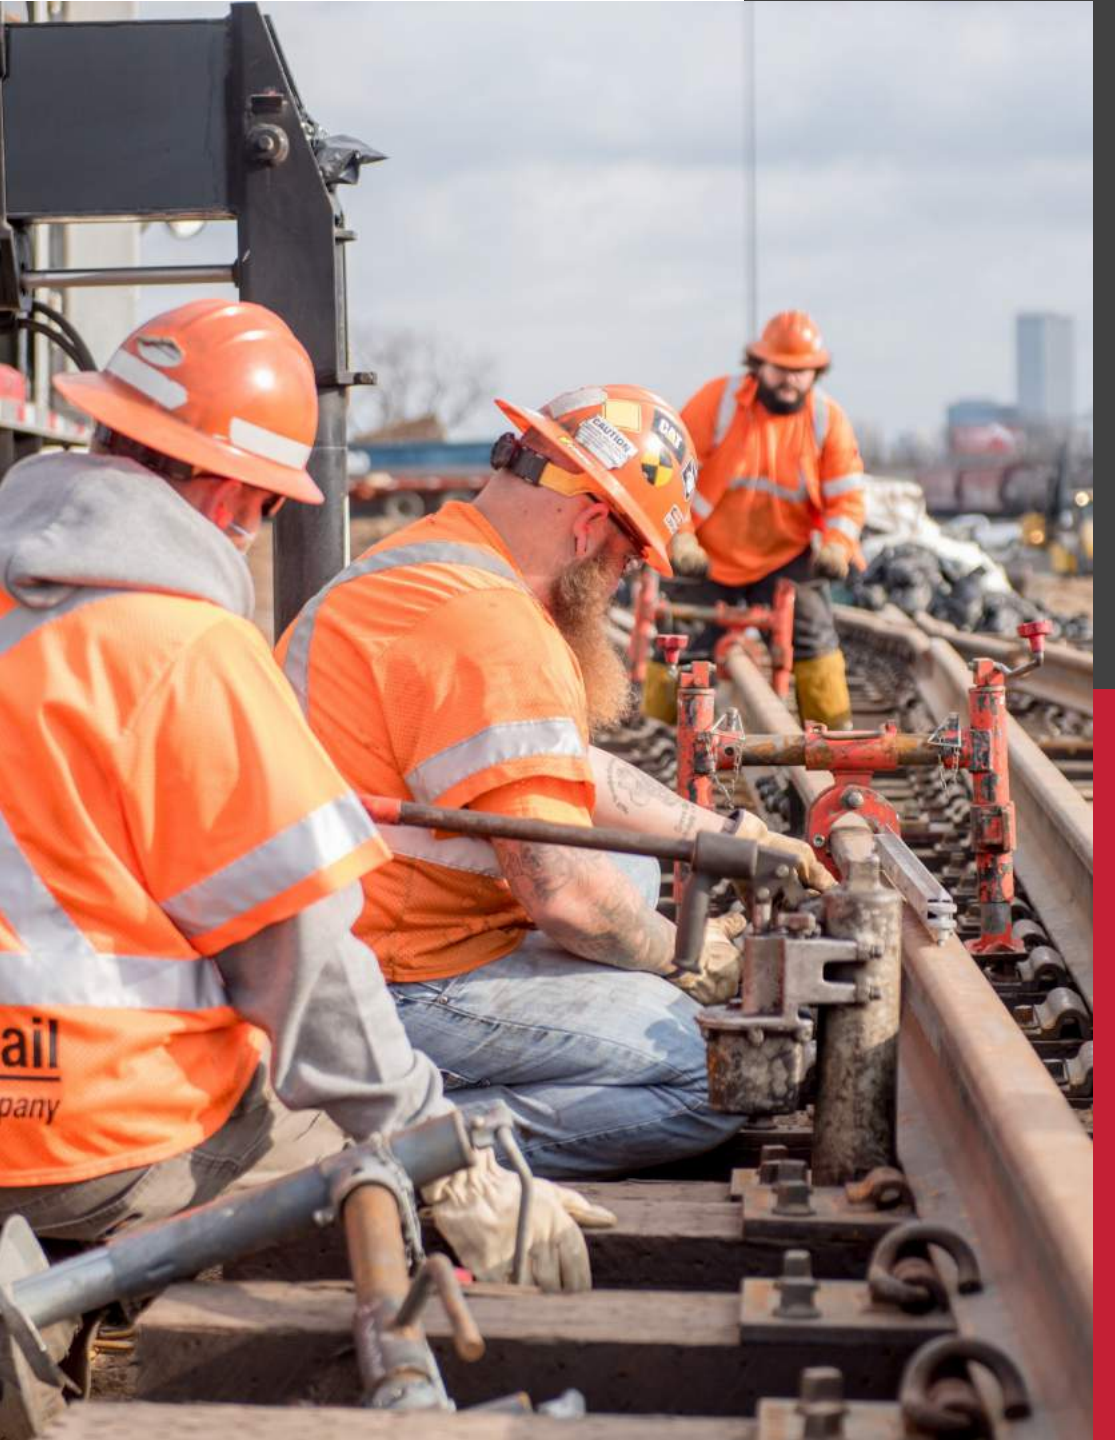

DuPont is an American multinational chemical company first formed in 1802 by French-American chemist and industrialist Éleuthère Irénée du Pont de Nemours. The company played a major role in the development of Delaware and first arose as a major supplier of gunpowder.

The challenge:

With a diverse and global network of research centers and manufacturing sites, DuPont has a dedicated project controls team for each location that manages the entire project portfolio within their sites. Managing project data from different sites across the organization caused a challenge for reporting at an enterprise level causing delayed reporting, manual errors, and mismatches in key resource directories to name a few. It was time to move to a cloud-based solution that would provide a connected, holistic view of the enterprise project portfolio structure and position them for the next stage of growth.

The results:

Working in partnership with Compass Consult to enhance their Primavera P6 capabilities has ensured DuPont now have a centralized Project Controls system on the cloud, this increases visibility across all site with real-time reporting and dashboard capabilities while gaining increased efficiencies in resource management and accurately forecasts project progress and funding requirements.

PROGRESS RAIL

The client:

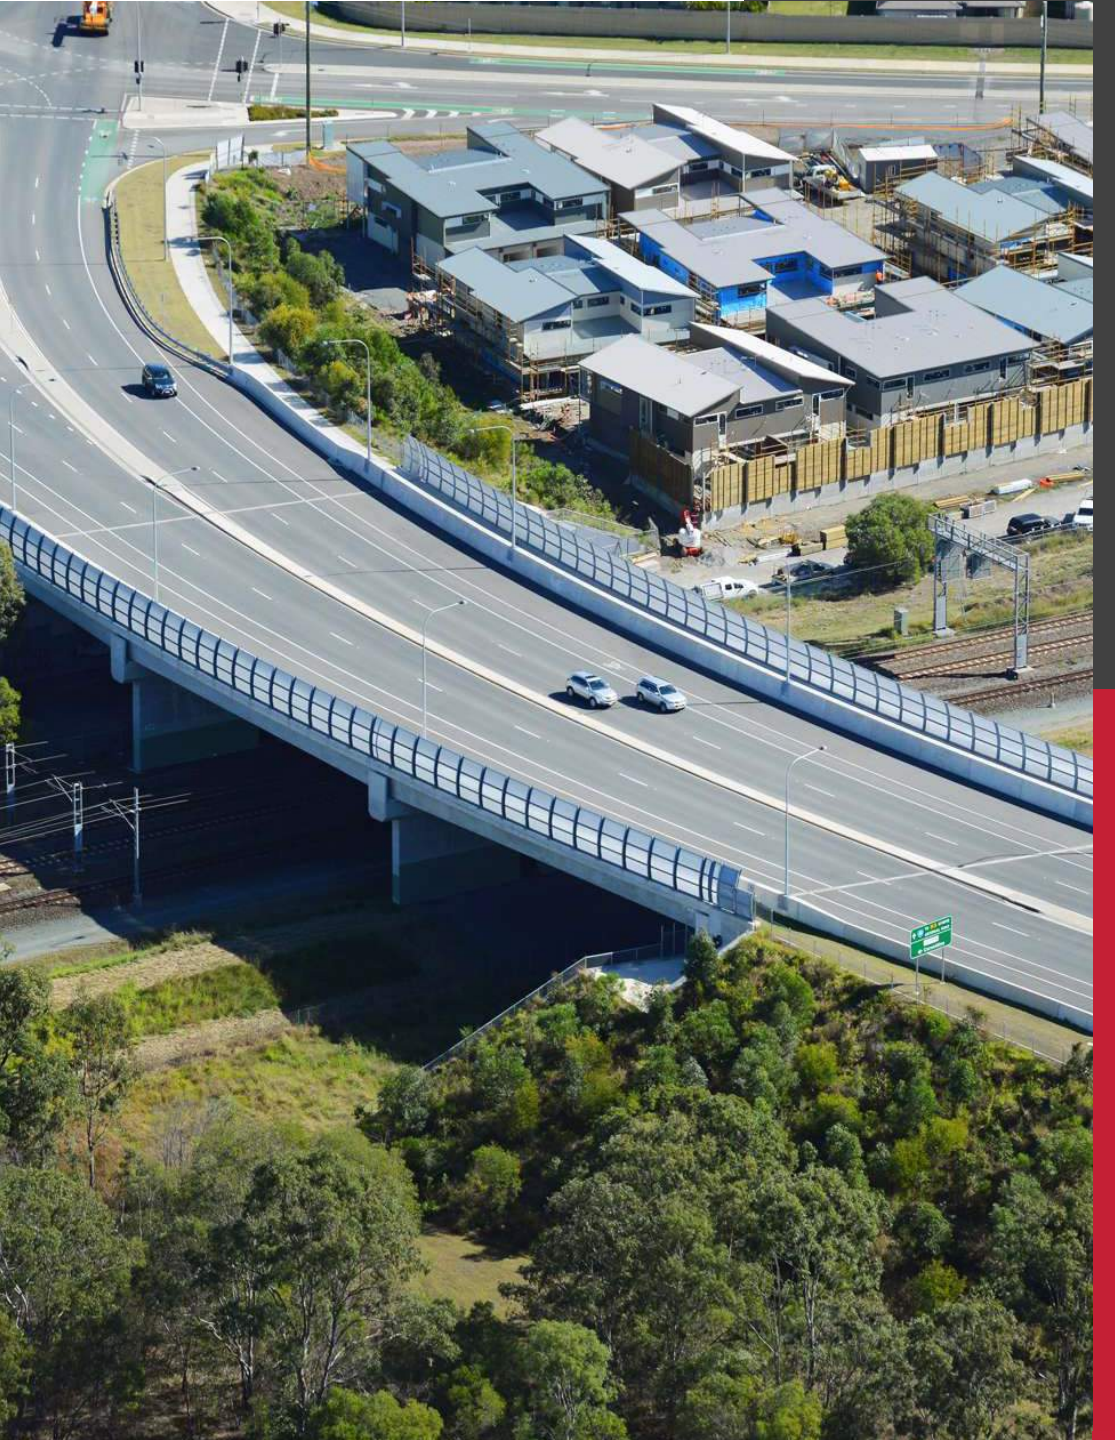

With nearly 200 Operations in 16 Countries Worldwide and 8,000+ Employees, Progress Rail serves as a leader in rolling stock and infrastructure solutions across the United States, Canada, Mexico, Brazil, Germany, Italy, Australia, China, India, South Africa, the United Arab Emirates and the United Kingdom.

The challenge:

Progress Rail's project management teams had different localized systems for all territories which led to inefficiencies in solving management inadequacies. All important project information was siloed with standalone applications with version mismatches and different resource directories for each of the project teams. It was time to move to a cloud-based solution that would provide a connected, holistic view of the enterprise project portfolio structure and position them for the next stage of growth.

The results:

Working in partnership with Compass Consult to enhance their Primavera P6 capabilities has ensured Progress Rail now have a centralized Project Controls system on cloud needed to increase visibility across all territories with real-time reporting and dashboard capabilities while gaining increased efficiencies in resource management and accurately forecasts project progress and funding requirements.

BIELBY HOLDINGS

The client:

Bielby is a wholly owned and operated Queensland-based civil engineering company providing leading earthworks and infrastructure capabilities to clients across Australia.

The challenge:

With Bielby, the major challenge was to manage a high number of standalone P6 licenses with zero end-user collaboration, disparate databases, absence of centralized project control systems/directories leading to delayed reporting, stakeholder miscommunication and project delays.

The results:

For Bielby, it was really important to partner with a company that can manage its P6 licenses and provides industry-leading technology and support. Compass Consult offered Primavera P6 EPPM application on Cloud for its project management team and integrated P6 with its reporting tools and other legacy applications to manage smooth rollout of project related data with wide array of stakeholders in real time.

SIEMENS

The client:

Siemens is a leading technology company that creates technology that empowers customers all over to positively transform the industries that form the backbone of the economies – industry, infrastructure, transport, and healthcare.

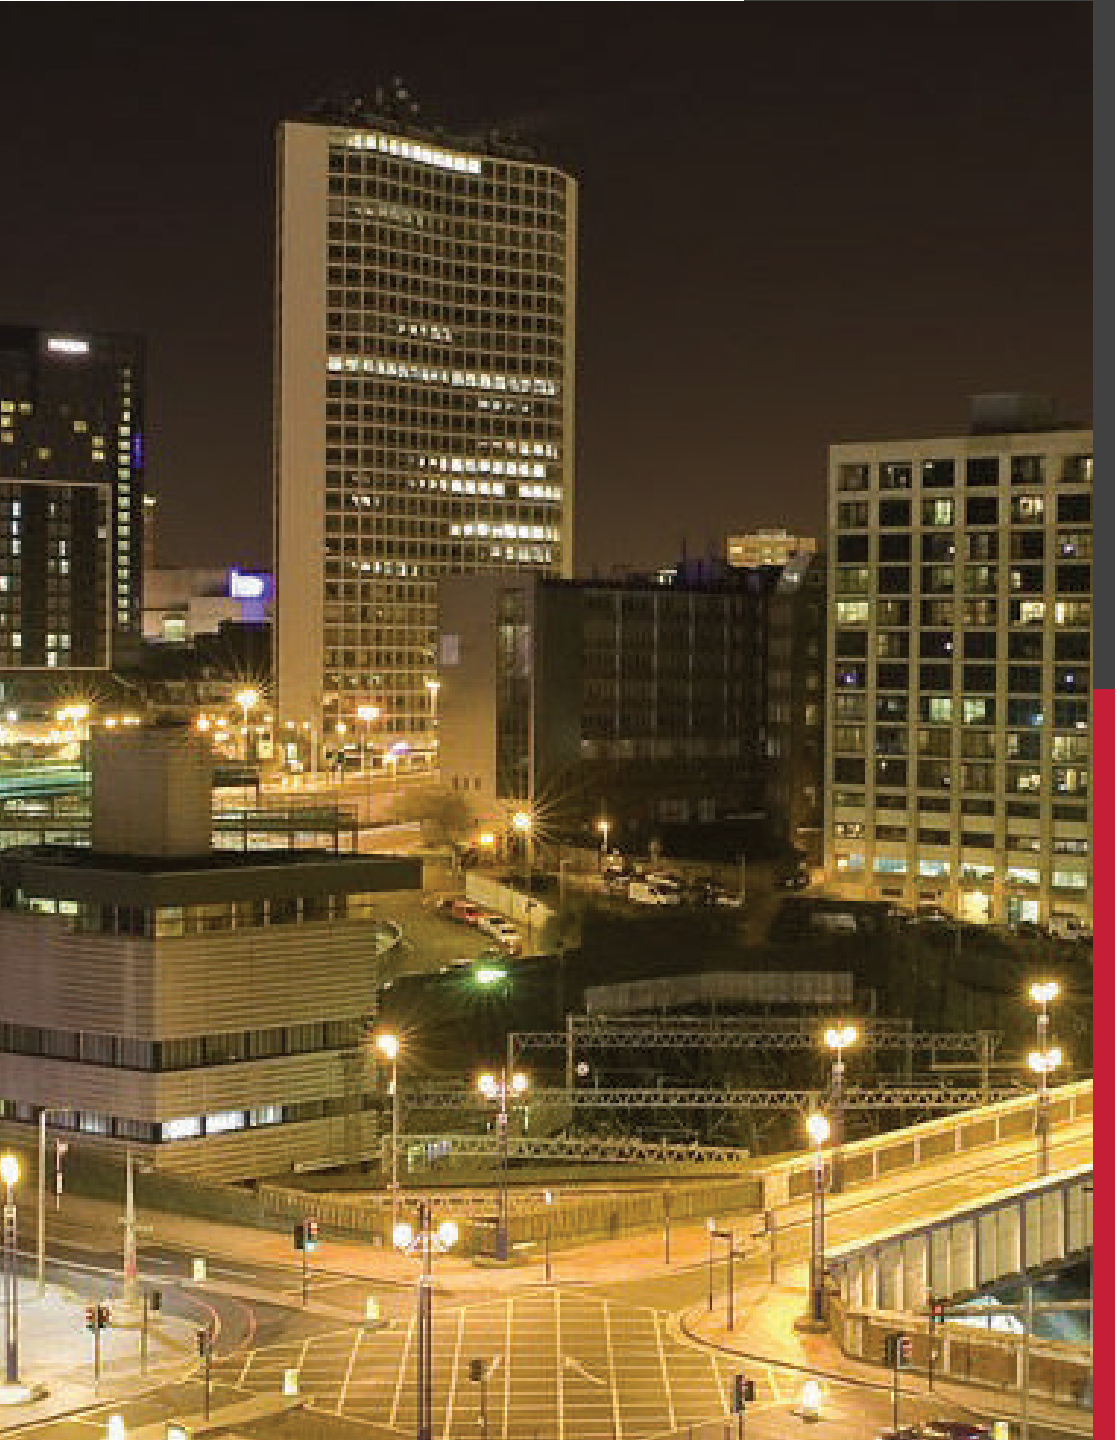

The challenge:

Siemens had a lead planner who would also manage their server maintenance. This was someone that Siemens depended on for almost everything and every single time the resource was unavailable, things would slow down. Siemens wanted someone who would look into this area for them and help the planner concentrate on other projects.

The results:

Working in partnership with Compass Consult, Siemens was able to instigate annual upgrades of Primavera P6 EPPM to the latest version to ensure Siemens Mobility's systems were up-to-date. Via the technical support and maintenance by the Compass team, they were able to overcome the single resource reliance and access ongoing technical support and maintenance for the current on-premises deployment of Primavera P6 EPPM, which involves four servers (two current environments and two sandbox environments). This also included providing functional support for approximately 40 users of the system plus quarterly reviews of application logs, applying critical Oracle patches, and P6 patch sets, as well as quarterly SQL Server patches to ensure long-term health.

Overall, Siemens has been able to enhance the maintenance and upgrading of the existing Primavera P6 EPPM system by accessing comprehensive support for the technical and functional needs of all users.

RPS GROUP PLC

The client:

RPS Group plc (LSE: RPS) is a global professional services firm of consultants and service providers, headquartered in Abingdon-on-Thames, England.

The challenge:

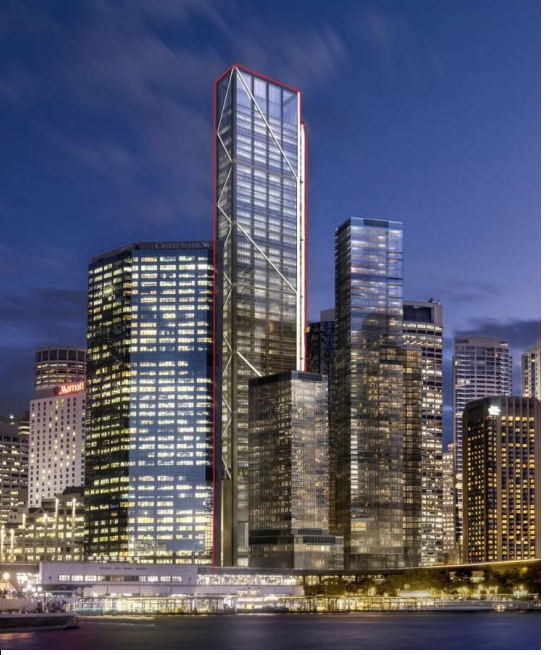

RPS Group was using Excel and MS Projects, which was not an efficient process and involved a lot of manual data handling. They were in desperate need of streamlining their project management services and improving project outcomes through better planning, tracking, and resource management. Specifically, they wanted to enhance their capabilities of handling large-scale projects.

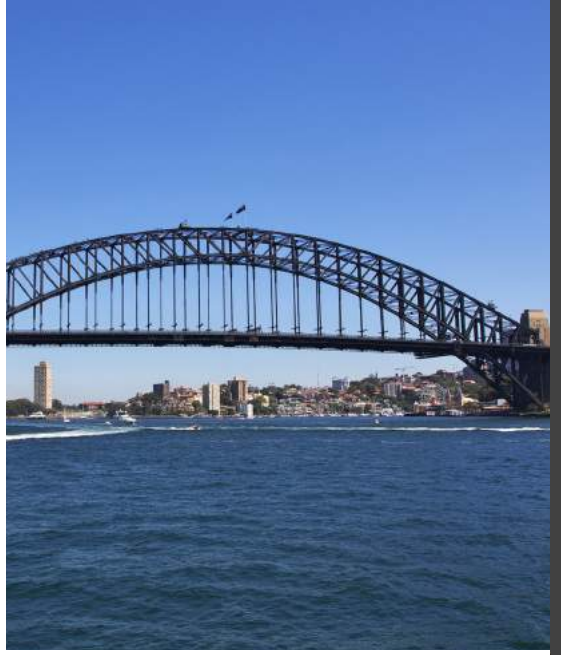

The results:

Working with Compass Consult, they implemented Primavera P6, which is specifically designed to manage very large and complex projects - handling multiple projects simultaneously with over 100,000 activities with ease. On top of this, they were also able to significantly bolster their resource management and forecasting, allowing them to better manage large projects and have better visibility across the board.

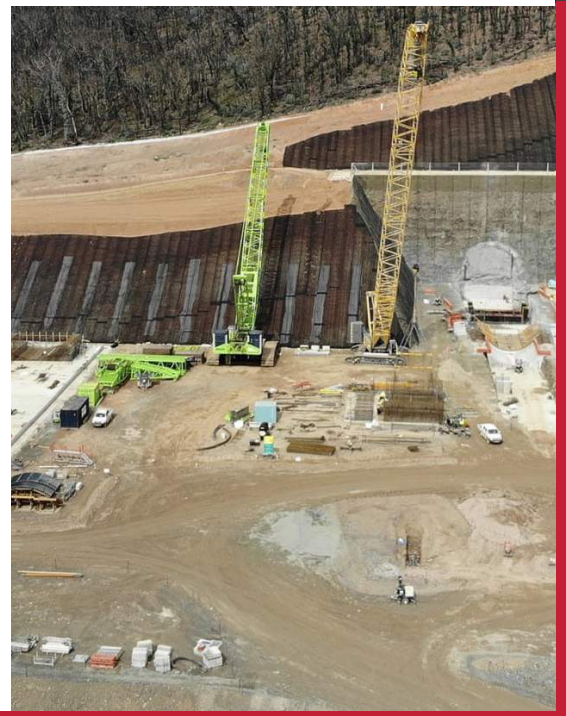

The implementation of Primavera P6 also provided more flexible and powerful scheduling options including the ability to schedule activities based on priorities and resource availability, in addition to advanced risk management features, allowing chedulers to analyze and mitigate risks more effectively.

Most importantly, RPS was also afforded greater customisation and scalability, allowing them to accommodate bigger projects and the growth of a business.

OUR MAJOR PROJECTS

TRANSPORT PROJECT

Sydney Harbour Bridge Project

Client: Alimak Group

Contract value: $29.4 Million

Project Snapshot:
The NSW Government through Roads and Maritime Services has signed a contract with Manntech in Australia for a vertical access solution project based on BMUs, worth MSEK 170. The BMUs will be designed and manufactured at the Manntech factory in Germany. This is the largest order ever awarded to Alimak Group.
The project covers design, manufacturing, installation and service of two large motorized high complexity gantries spanning the bridge carrying Building Maintenance Units (BMUs), to enable full access for maintenance purposes on the iconic structure.

Our Scope:
Primavera P6 Programme Consultancy Support for Alimak Group. Includes Delay and Extension Of Time Claims along with progress updates.

ORACLE | PARTNER

TRANSPORT PROJECT

Sydney Metro City & Southwest

Client: Schneider Electric

Contract value: $443 Million

Scope of Works:
Sydney Metro is Australia's biggest public transport project. From the north west, metro rail is being extended under Sydney Harbour, through new underground city stations and beyond to the south west. In 2024, Sydney will have 31 metro railway stations and a 66km standalone metro railway system, revolutionizing the way Australia's biggest city travels. All Building Monitoring and Control systems throughout the stations are being managed by Schneider.

Our Scope:

Primavera P6 Software Supply and Install
P6 Implementation&Consultancy Support for all metro stations

HIGH RISE PROJECT

Circular Quay Tower (Salesforce Tower)

Client: Schneider Electric

Contract value: $1.5 Billion

Project Snapshot:
The Salesforce Tower is a skyscraper under construction in Circular Quay, Sydney, Australia. The building will be the city's tallest office building at a height of 263.1 metres on its scheduled completion date of mid-2022. It is part of a A$5 billion redevelopment of the Circular Quay precinct, alongside the new buildings of Quay Quarter Tower, One Circular Quay, 56 Pitt Street, Sydney, 200 George Street, the terminus of the new CBD and South East Light Rail and redevelopment of the ferry wharves. The building is being constructed by Lendlease.
Software company Salesforce acquired naming rights to the tower in late 2019 and will occupy 24 levels of the building upon its completion.

Our Scope:
Primavera P6 Programme Consultancy Support for Scheider Electric.
Includes Delay and Extension Of Time Claims.

ENERGY PROJECT

Snowy 2.0

Client: MAAS civil

Contract value: $21 Million

Scope of Works:
Snowy 2.0 is the next chapter in the Snowy Scheme's history. It is a nation building renewable energy project that will provide on-demand energy and large-scale storage for many generations to come. The project involves linking two existing dams, Tantangara and talbingo, through 27km of tunnels and building a new underground power station.

Our Scope:
Primavera P6 Software Supply and Install
P6 Implementation & Programme Management Support for Talbingo Site

ENERGY PROJECT

Client: Eftech-International

Contract value: $20 Million

Project Snapshot:
The Cooper Basin covers an area of approximately 127,000 sqkm and extends across the northeast of South Australia and southwest of Queensland.
The Eromanga Basin covers an area of approximately 1,000,000 sqkm and extends ove South Australia, Northern Territory, Queensland and New South Wales.
The Cooper-Eromanga basin is Australia's most prolific oil and gas basin and continues to yield new discoveries.
Through Beach's Western Flank oil and natural gas operations, our Cooper Basin joint venture partnerships and other activities in the region, the basin remains a substanial part of our operations.

Our Scope:
Primavera P6 Programme Consultancy support for EFTECH, includes automated project controls along with progress updates.

ORACLE | PARTNER

AIRPORT PROJECT

Melbourne Airport Taxiway Zulu & Terminal 2 Aprons

Client: ADB Safegate

Contract value: $30 Million

Scope of Works:
Construction of 300,000m2 plus of new pavements across new, extended & realigned taxiways in the north of the airfield enabling future expansion of the international termianl as well as the new Northern Access Route incorporating security screening facility & roads infrastructure.

Our Scope:
Microsoft Project Software supply and Install
Microsoft Project Implementation & Consultancy Support
Ms Porject Corporate Training

ORACLE | PARTNER

AIRPORT PROJECT

Airport Authority of Hong Kong Airfield Ground Lighting Works

Client: ADB Safegate

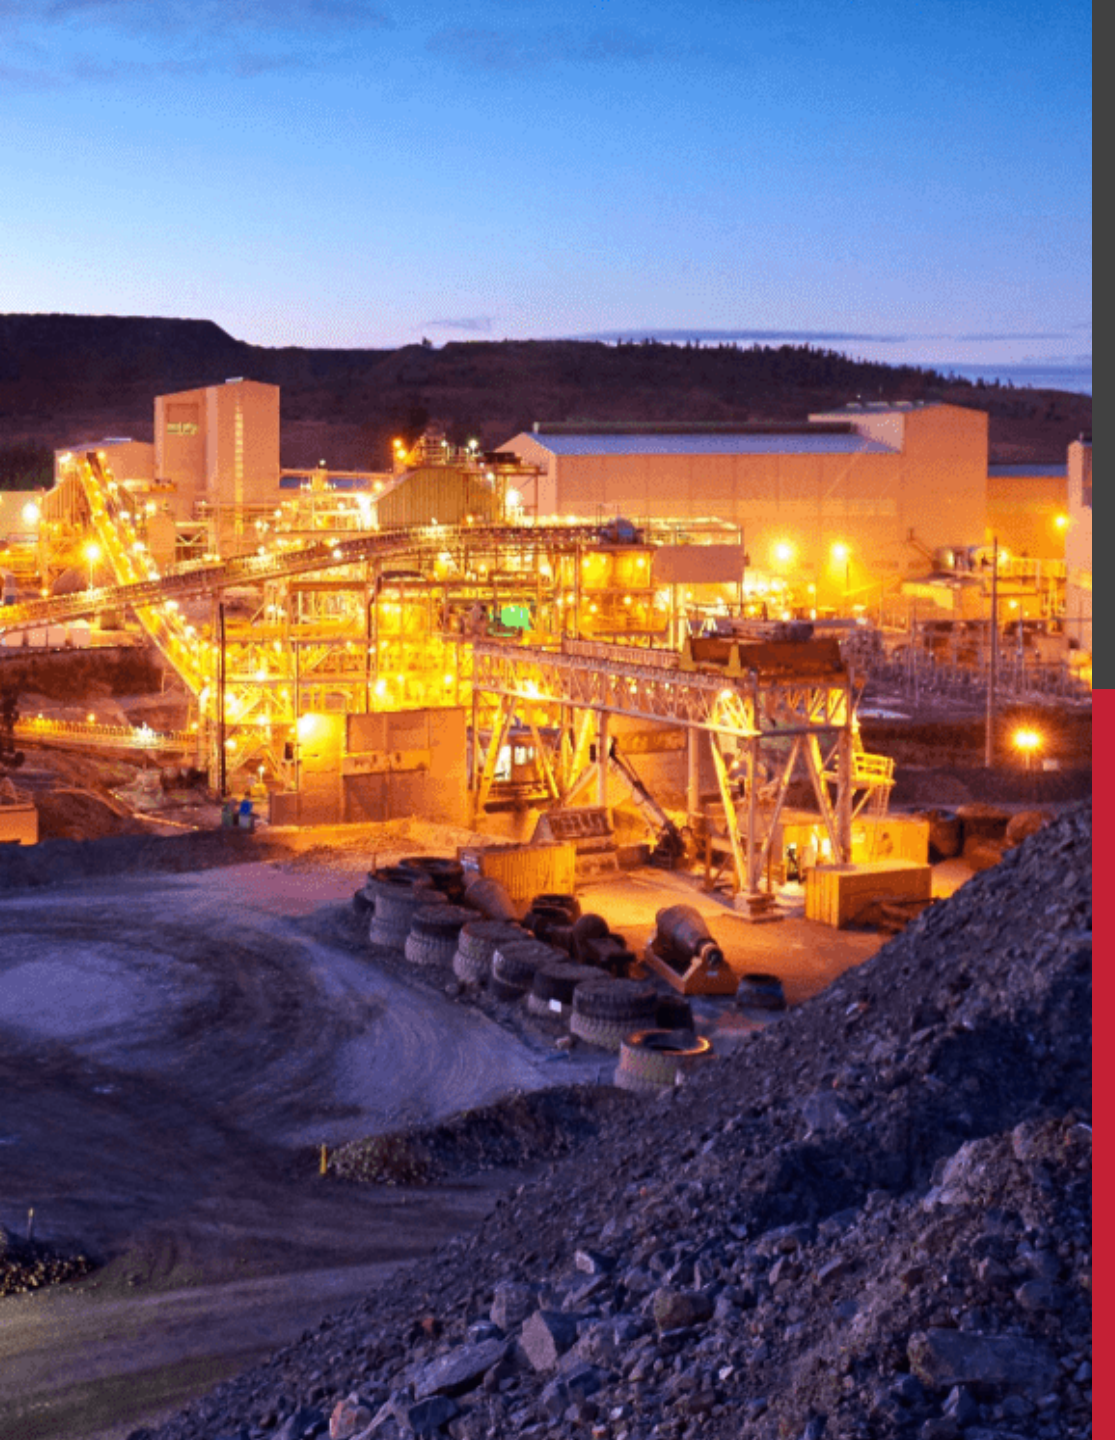

Contract value: HK$830 Million

Scope of Works:
The scope of the AGL works shall include detailed design of the AGL system, preparation of design documents and drawings, manufacture, fabrication, supply, eraction, installation setting to work, testing,commissioning and handover of the AGL system.

Our Scope:

Primavera P6 Software supply and Install
P6 Implemantation & Consultancy support
Primavera P6 Corpoate training

ORACLE | PARTNER

MINING PROJECT

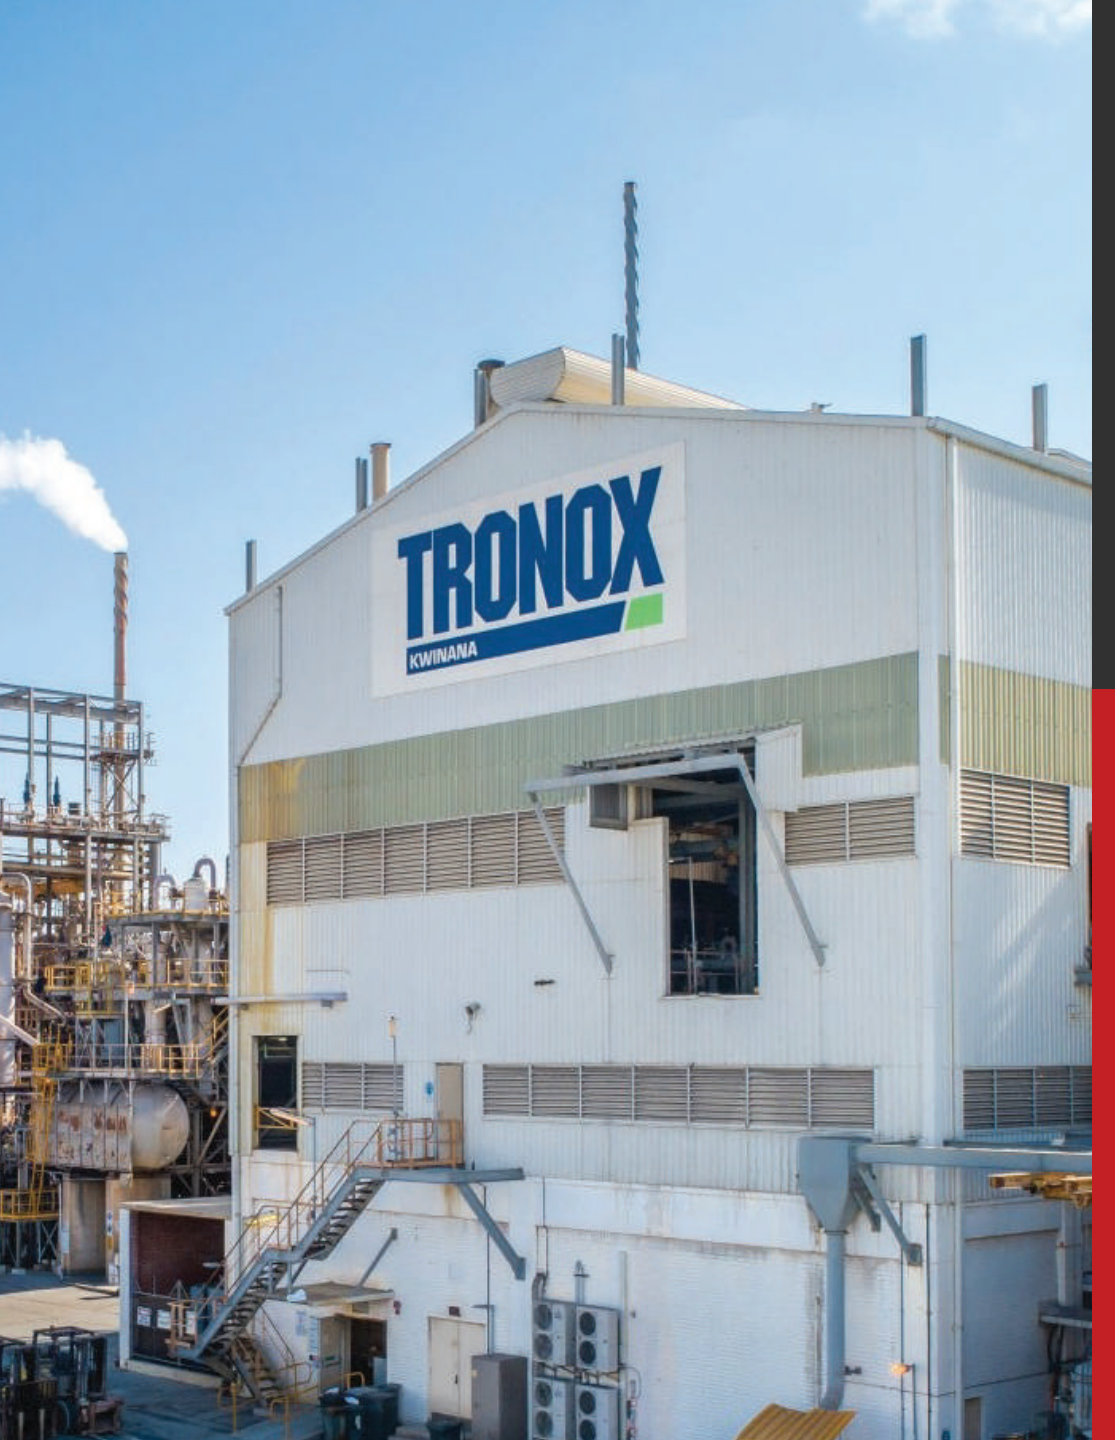

Secondary Crusher E&L at Northparkes Mines

Client: JTMEC Pty Ltd

Contract value: N/A

Scope of Works:
The scope of work included the installation of earthing grid, switch rooms, kiosk, instrumentation, the relocation of services and high voltage terminations.

Our Scope:
Primavera P6 Software supply and install

MINING PROJECT

Tronox Atlas Mine Project

Client: MAAS Civil

Contract value: $200 Million

Scope of Works:
Tronox is planning to commence a fourth mine called Atlas-Campaspe in the Murray Basin. Atlas Campaspe is located 80 km north of Balranald and approximately 270 Kms from Broken Hill. Development on the ground commenced in 2018. At this stage ,initial clearing along the mine path has been completed and topsoil stripping, in accordance with the environmental plan,is proceeding. Construction at the site and rail siding is planned to commence in early 2019 with production starting in the second quarter of 2022.

Our Scope:

Primavera P6 Programme Consultancy Support for MAAS Civil. Includes Delay and Extension of Time Claims along with progress updates.

WHY NAVIGATE PROJECTS WITH COMPASS CONSULT?

- Compass Consult has two discrete aims; provide quality PMO and program management solutions to Companies from choosing the right Project Management Software to deploying the solutions ready to implement on projects and the second is the delivery of high-quality 3D Modelling, 4D simulation and BIM consulting services that help eliminate delays and losses.

- We Supply the latest Project Management Software, Consultancy and Coaching along with our advanced 4D planning solutions.

- We are the only Full Digital Project Management Company in the ANZ region who can help you transform the way you do business by making you more money and creating an edge in the markets you operate.
